SUMMARY

Patrick Kilbourne is a Director at Berkeley Research Group (BRG), a leading global expert services and consulting firm. He is a Certified Public Accountant (CPA), a Certified Management Accountant (CMA), a Chartered Global Management Accountant (CGMA) and a Certified Fraud Examiner (CFE). He is also Certified in Financial Forensics (CFF) and Accredited in Business Valuation (ABV) by the American Institute of Certified Public Accountants (AICPA).

He earned a Master of Business Administration (MBA) degree from the University of Pennsylvania's Wharton School of Business, a Master of Accountancy degree from Brigham Young University and a Bachelor of Science degree in Accounting from Brigham Young University. Mr. Kilbourne is an expert in applying finance, accounting and economic analysis to intellectual property damage assessments, lost profits calculation and forensic accounting investigations. He has been retained as an expert in numerous matters and has testified as an expert in both federal and state venues.

A substantial portion of his career has been spent in advising companies in non-litigation matters relating to forensic investigations, royalty audits, implementing costs saving practices, and operational issues. His experience spans a broad range of industries, including pharmaceutical, technology, software, retail products, manufacturing, automotive, healthcare, biotechnology, construction, real estate, telecommunications, chemicals and oil & gas.

Prior to joining BRG, he spent 9 years at LECG as a Director. Prior to LECG he was the head of Arthur Andersen's Strategy Finance & Economic Consulting practice in Salt Lake City, where he oversaw accounting, intellectual property, economic consulting, and forensic accounting services.

Institute of Certified Fraud Examiners

Institute of Management Accountants

American Institute of Certified Public Accountants

Utah Association of Certified Public Accountants

REPRESENTATIVE EXPERIENCE

Lost Profits related to Trade Secrets, Breach of Fiduciary Duty and Defamation

Engaged to calculate lost profits related to misappropriation of trade secrets and breach of fiduciary duty in a matter in which the president of the company started a competing business and hired several former employees. The matter also involved claims of defamation.

Misappropriation of Trade Secrets

Engaged as expert to calculate damages related to the misappropriation of trade secrets. Defendant was accused of breach of contract and misappropriation of technology related to the improvement of seismic construction techniques.

Trade Secret Lost Profits and Forensic Investigation

Engaged as expert to calculate lost profits related to the alleged misappropriation of trade secrets. The engagement included a forensic investigation of the parties accounting records.

Intellectual Property Infringement

Engaged as an expert by one of the world's foremost software and service companies to calculate damages regarding an intellectual property infringement and breach of contract claim related to software code.

Intellectual Property Infringement / Software Counterfeiting

Engaged by a leading network software provider to calculate lost profits resulting from alleged intellectual property infringement, counterfeiting and the improper sales and return practices of a software reseller.

Intellectual Property Lost Profit, Reasonable Royalty and Disgorged Profit Analysis

Conducted a damage calculation on behalf of a defendant for alleged intellectual property infringement. The issue involved guide software for cable set-top boxes. The analysis included the determination of lost profits, a reasonable royalty examination, disgorged profits and the calculation of profits related to convoyed sales.

Intellectual Property Lost Profit and Reasonable Royalty Analysis

Engaged as an expert to calculate damages for alleged patent infringement related to a consumer product. Damage calculations included lost profits and reasonable royalties.

Intellectual Property Lost Profits and Reasonable Royalty Calculation

Engaged as an expert to analyze lost profits and determine reasonable royalties for a billion-dollar fitness company that was accused of patent infringement. I provided testimony in the state court of Utah

Defamation Lost Profit Analysis

Engaged to review alleged defamation related damages by a plaintiff. The defendant also submitted counter claims for defamation.

Software Installation Damage Calculation

Reviewed the damage calculation related to the failed installation of an Enterprise Resource Planning software (ERP) package.

Copyright Infringement

Engaged to determine a reasonable license fee for misappropriated intellectual property.

Forensic Investigation

Conducted a forensic investigation of the profit sharing calculation made by a party to an alliance agreement. The collaboration agreement related to one of the top ten best-selling pharmaceuticals in the world.

Forensic Investigation

Conducted a forensic investigation of a royalty audit prepared by an accounting firm covering pharmaceutical sales of multiple products totaling \$37.5 billion over three years. The accounting firm alleged underpaid royalties of approximately \$50 million. We identified multiple errors in the accounting firm's calculations and analysis and concluded that royalties had been overpaid by \$2.7 million.

Forensic Investigation

Engaged to provide expert testimony regarding pharmaceutical industry practices for audit and document retention provisions typically included in profit sharing agreements. The matter related to two biotechnology companies involved in the development of antibody therapies for lower respiratory tract diseases.

Expert Testimony on Forensic Investigation Practices

Engaged to provide expert testimony regarding the industry policies and practices for conducting a forensic royalty investigation.

Forensic Royalty Investigation

Engaged to conduct a royalty investigation of a healthcare licensee with sales affiliates located throughout the world.

Software Royalty Analysis

Engaged to calculate royalties related to an operating system software provider. The distributor/reseller allegedly underpaid royalties over a several-year period.

Pharmaceutical Royalty Investigation

Conducted a royalty investigation on behalf of a pharmaceutical company. The purpose of the investigation was to ensure the proper calculation and payment of royalties by the licensee.

Software Royalty Calculation

Engaged as expert to calculate damages for a network software provider related to claims of the inappropriate calculation of royalties and breach of contract.

Intellectual Property Royalty Dispute

Expert for intellectual property dispute involving the underpayment of royalties. Royalties in this instance were based on the profitability of the business operations. The licensee had underpaid royalties based on the alleged manipulation of profits.

Class Action – Customer Service

Engaged by a technology manufacturer to assist with a customer service class action law suit. The claim related to the alleged late or improper fulfillment of rebates and merchandise in a consumer promotion campaign.

Class Action – Magnuson-Moss Consumer Warranty

Assisted a technology client in resolving a Magnuson-Moss consumer warranty class action law suit. Plaintiffs claimed the Company did not comply with its product warranty obligations. The engagement included the identification of class members, which approached 4 million, settlement assistance and class administration, including all class communications and notifications.

Class Action Certification

Oversaw the evaluation of a firm's financial condition and liquidity in relation to a class action certification.

Bank Fee Class Action

Assisted one of the largest financial institutions in the western United States in a class action matter brought by trust beneficiaries alleging that the Bank, as trustee, engaged in a pattern of overcharging personal trust accounts for trustee fees.

Securities Litigation - Software Revenue Recognition

Assisted in a securities litigation matter in which a Big-5 accounting firm was accused of co-conspiring to inappropriately recognized revenue for ERP software contracts.

Breach of Contract for Technology Service Provider

Expert for settlement negotiations between a major software supplier and a technology service provider. The analysis consisted of a damage calculation resulting from the software providers alleged breach of contract.

Breach of Contract in IT Outsourcing Industry

Engaged to evaluate economic losses related to a breach of contract between a software company and a server outsourcing business.

Breach of Contract - Data Center

Assisted an outsourcing data center in evaluating economic losses related to a business interruption event.

Damages Related to Anti-Competitive Actions

Engaged by a city to calculate damages related to alleged actions of a fixed-base airport operator (FBO). The FBO had allegedly engaged in anti-competitive activities that caused lost profits for a competing FBO. The engagement included the analysis of lost profits related to repair and service compensation, labor costs and lost fuel sales.

Oil Sands Mining Business Interruption Lost Profit Analysis

Engaged by one of the oil majors to conduct an economic loss analysis related to a short-term shut down of an oil sands mining operation. The analysis included determining the revenues and expenses that would have occurred "but for" the shutdown. The incremental cost analysis included a detailed review of the specific activities that drive the costs of the mining operation, including natural gas, electricity, process chemicals, raw materials, etc. I calculated the incremental lost profits to be \$220 million, which was the figure agreed to in settlement negotiations.

Review of Joint Business Operations

Conducted an investigation of a joint business between two major pharmaceutical companies with global operations. The investigation included a detailed review of the appropriateness of cost allocation methodologies and contract compliance issues. We reviewed the business operations and profit sharing payments in multiple locations and identified numerous compliance issues, including improper cost allocations and the inclusion of contractually disallowed costs. The findings resulted in substantial recoveries for the client.

Product Costs Analysis for Internet Search Engine

Product costs for most companies consist of easily identifiable costs such as raw material, labor and other direct costs. The products of Internet content providers are web pages and the costs associated with creating a web page have few similarities to those of more tangible products. I led the development of a product profitability methodology for a major Internet search engine. This analysis enabled the Company

to understand the cost drivers of creating a web page, the profitability of each web page and ultimately make more informed economic product line decisions.

Cost Analysis / Review of Joint Business Operations

Led a review of joint business operations on behalf of a corporation that provided critical enabling technology to one of world's largest automotive suppliers. The automotive supplier was responsible for all aspects of the business operations, including manufacturing, marketing and selling. The analysis included a detailed review of the automotive supplier product cost drivers and involved the evaluation of transfer prices from multiple international divisions. The review of the business operations and profit sharing calculations identified multiple issues related to cost allocations, transfer pricing and contract compliance.

Business Process and Cost Analysis for Repair & Replace Function of Technology Company

Developed a strategy for the repair and replace function for a high-technology computer component manufacturer. The company was experiencing product returns of over \$100 million per year. These products were either, repaired and returned to the customer or discarded and replaced with new product. The new process was re-designed to dramatically reduce costs through a careful evaluation of activity based costing and to improve customer service by providing the customer with product quickly.

Profitability and Pricing Analysis of Mining Equipment

Engaged by a large mining equipment retailer to examine equipment maintenance contracts valued at \$40 million per year and provide a strategy to improve profitability through changes in pricing and an evaluation of cost drivers. The examination identified the profitable and unprofitable components of the contracts and resulted in increased profitability, better customer service and leverage in contract negotiations.

Tax Refund Assessment

Rebutted a government denial of a refund for an excise tax assessment on behalf of a munitions company. The project included a calculation of the tax refund; a market analysis and a determination of whether the company established prices based on market prices or a cost-plus calculation.

Biotechnology Analysis of Cost and Demand Drivers

Conducted a financial analysis for a biotechnology company. The company was faced with a critical decision to build, buy or outsource manufacturing capacity. The choices were driven by a complex and unpredictable combination of costs, demand and capacity. We assisted the company in developing a framework for analyzing the decision, which included and evaluation of the activities driving costs and demand.

Cost-Plus Pricing Analysis

Engaged by an explosives manufacturer to analyze product prices related to a cost-plus pricing agreement. The project included a review of direct and allocated costs.

Business Interruption of Oil Refinery and Pipeline

Engaged to calculate lost profits and economic losses related to a pipeline explosion. The explosion led to the use of alternative transportation methods to replace the pipeline capacity. Thus, a portion of our analysis included a comparison of pipeline transportation costs and alternative transportation costs.

Damage Calculation for Gold Mine

Engaged on behalf of a gold mining operation to calculate damages based on the company's reliance on the analysis and representations of one of the world's leading engineering, construction, and diversified services firm.

Investigation of General Partner

Oversaw a damage calculation and investigation of a general partner on behalf of a limited partner for improper management and accounting improprieties. This analysis involved the use of forensic accounting methods to trace the movement of funds through multiple accounts and business entities formed by the general partner.

Damage Calculation related to Purchase Agreement

Assisted in the quantification of damages incurred by a leader in the automotive safety product industry. The dispute centered on the acquisition of the safety products operations of an industry competitor.

Environmental Antitrust Damage Calculation

Analyzed the business plan and calculated damages for a nuclear waste disposal facility in the context of antitrust litigation.

Savings & Loan Damage Analysis

Assisted in the prepared of a damage claim analysis on behalf of a Saving and Loan Institution related to the S&L crisis.

Biotechnology Royalty Audit

Conducted royalty audits in several countries related to medical testing equipment.

Mining Lost Profit Analysis

Engaged to conduct a forensic and lost profit analysis of a large gravel mining partnership. The case included accusations of fraud and mismanagement against the partner managing the mining operations.

Business Interruption of Travel Agency

Engaged to evaluate and testify regarding the lost profits and business valuation damages experienced by a travel agency as a consequence of a business interruption event.

Retail Lost Profit Analysis

Engaged to evaluate lost profits related to contaminated food supplied to a food manufacturer.

Economic Losses of Business Interruption

Evaluated economic losses related to a fire in a paint manufacturing operation.

Economic Losses of Business Interruption

Evaluated economic losses related to a fire in a metals manufacturing operation.

Business Interruption Lost Profits in Telecommunications Industry

Engaged on behalf of a wireless carrier to calculate lost profits caused by the alleged negligence of a third-party service provider.

Taking Dispute

Engaged by a government entity to value property and evaluate economic losses related to an eminent domain taking.

Fraud Investigation of Real Estate Partnership

Assisted in the accounting investigation of a residential real estate partnership. The general partner allegedly misappropriated funds from the partnership through the use of related party sub-contractors.

Investment Services SEC Investigation

Assisted the SEC in a claim resolution matter related to alleged fraudulent actions of an investment services firm.

Antitrust Price Fixing Damage Calculation

Prepared a damage analysis related to antitrust violations in an industry-wide price fixing matter in the U.S. vitamin manufacturing industry. The analysis combined finance and accounting theories into an easily understood determination of reasonable profits and potential excess profits during a decade-long period of antitrust violations.

Management Fraud Investigation

Engaged by the owner of a motor-sports vehicle retail operation to investigate the alleged fraud of the business managers.

Money Laundering and Fraud Investigation

Oversaw the creation of a litigation database containing over one hundred thousand bank transaction documents related to a money laundering and fraud investigation. The database was created to model and track the flow of funds among multiple entities over several years.

Accounting Malpractice

Oversaw an accounting malpractice investigation related to an inventory valuation. The analysis consisted of an assessment of the inventory overstatement, an opinion on the nature of the malpractice, which included not adhering to professional accounting standards and not following due professional care.

FTC Investigation

Assisted a high-technology client in responding to a FTC investigation of alleged FTC rules violations. The project included the preparation of responses to the FTC's inquiries over an extended period, oversight of the collection and preparation of details on tens of thousands of customer transactions and assisting the client in negotiations that resulted in a satisfactory resolution to the government's investigation.

Municipal Bond Litigation and Bond Portfolio Reconciliation

Assisted one of the world's largest banking institutions in a California False Claims Act litigation brought on behalf of the State and more than 1,400 political subdivisions seeking more than \$4 billion in damages. The claims alleged failure to escheat unclaimed funds, fee overcharges and investment-related claims. The analysis involved dozens of accounting systems and more than 35,000 boxes of records. All claims against the bank were settled.

FTC Investigation

Assisted a high-technology client in responding to and resolving a FTC investigation related to an alleged failure to refund credit balances to customers.

Construction Claim Review

Engaged on behalf of the owner to investigate allegations of construction delays, disallowed cost reimbursement and excess billings from the general contractor, project engineer and project management company.

Lender Liability Lawsuit

Assisted a construction company in a lender liability lawsuit in which the lender allegedly forced the construction company into bankruptcy.

Investigation of Biotechnology Joint Venture

Engaged to investigate and analyze the operations and profit sharing of a biotechnology related joint venture. One of the partners suspected that the other party was not capitalizing on the shared intellectual property and, thus, not maximizing the client's profits from the joint venture.

Breach of Contract

Engaged to calculate lost profit damages for an alleged breach of contract related to repair services of circuit boards.

Telecommunications Breach of Contract Damage Calculation

Engaged by a major telecommunications provider in a breach of contract issues with a Local Exchange Carrier (LEC). The telecomm provider had allegedly breached a contract with the LEC. The LEC was launching a new business and was requesting damages based on lost profits.

Breach of Contract - Travel Industry

Calculated economic losses related to an alleged breach of contract for a travel services provider.

Breach of Contract - Manufacturing

Calculated economic losses related to an alleged breach of contract of a manufacturing operation.

Telecommunications Breach of Contract / Underpayment Damage Analysis

Engaged by a long-distance provider to collect and quantify data related to the phone usage of thousands of pay phones owned by a single entity. The dispute centered on the contractual and FCC mandated payments that should be made to the phone owner.

Health Club Acquisition Dispute

Engage by one of the leading health club companies to assess damages related to the alleged breach of contract related to the purchase of a smaller chain of health clubs.

Due Diligence Analysis for the Acquisition of Waste Disposal Companies

Conducted financial and operational due diligence analysis on behalf of Waste Management related to several acquisitions.

Acquisition Due Diligence Examinations

Conducted multiple corporate due diligence examinations of financial and business operations in compliance with SEC acquisition requirements.

Business Acquisition Due Diligence

Conducted a due diligence analysis of businesses to determine fit with acquiring company, reasonableness of business projections and accuracy of financial statements.

IPO Due Diligence Examination

Conducted due diligence review in the healthcare industry in relation to an initial public offering. The review included an examination of business operations, financial statements and financial forecasts.

Construction Cost Analysis

Engaged to evaluate cost overruns in a residential development project.

Water Treatment Plant Cost Analysis

Engaged on behalf of a municipal owner to evaluate cost claims of the general contractor in the construction of a large water treatment plant.

Financial Statement Audits

Conducted numerous financial statement audits of SEC, private and governmental organizations. Audits included evaluation of accuracy of all balance sheet and income statement figures as well as a review of estimates, reserves and contingent liabilities. Industry experience with audited financial statements includes healthcare, software, insurance, airline, marketing, technology, construction, engineering, retail and government organizations.

International Relocation of Business Functions

Assisted a manufacturer in evaluating the financial benefits of relocating certain company functions to a non-U.S. location. The evaluation indicated a financial benefit to the company. I then assisted the company in the actual transition.

Trust Fund audit and Reconciliation for the Bureau of Indian Affairs

Assisted the US Bureau of Indian Affairs (BIA) in auditing and reconciling Native American tribal trust funds. The BIA manages the trust funds for Native Americans that come from a variety of sources, including oil and gas production on Indian lands, grazing leases, coal production and timber sales on the allotted land of Native Americans. The reconciliation period was approximately twenty years. The project included working with and coordinating the activities and record keeping of numerous Native

American tribes and government organizations, as well as collecting and reconciling countless sources of electronic and paper documents. The project resulted in the reconciliation of billions of dollars of trust funds.

Black-Scholes Option Valuation

Engaged by a trucking company to value end-of-lease guarantees for a fleet of trucks. The valuation was performed using the Black-Scholes option pricing methodology.

Marketing Business Valuation

Assisted a marketing company in valuing its business.

Competitive Compensation Analysis

Engaged by the State of Hawaii to assess and testify regarding the reasonableness of the wages relative to the labor market of approximately 50,000 government employees.

Analysis of Government's "Ability to Pay" for Employee Wage Increases

Engaged by the State of Hawaii to assess and testify regarding its ability to pay for wage increases proposed by the State and the State Employee's union of approximately 25,000 employees

Compensation Analysis

Prepared a compensation analysis for a closely-held corporation. The analysis involved the determination of market wages for certain company positions and comparison to actual company wages.

Compensation and Benefits Analysis

Engaged to determine the compensation and benefits due to a group of employees that alleged the employer of underpayment.

Damages Related to a Non-Compete Breach of Contract Matter

Engaged to calculate lost profits related to an alleged breach of a former employee's non-compete agreement. The companies at issue provided insurance billing services to pharmacies.

Analysis of Government's "Ability to Pay" for Employee Wage Increases

Engaged by the State of Hawaii to assess its ability to pay for wage increases proposed by the State and the Nurses union.

Wrongful Terminations

Engaged to calculate economic losses in multiple wrongful termination disputes.

Analysis of Partner Compensation and Distributions for Mining Partnership

Engaged to analyze the operations of a mining and real estate partnership and determine compensation/distributions due the partners per the operating and employment agreements.

Orange County Bankruptcy

Assisted Orange County in the largest municipal bankruptcy in history. Assessed the County's obligations toward creditors participating in the County's Investment Pool. Negotiated the resolution of \$900 million

in claims against the county. Coordinated and accounted for the disbursement of \$400 million to creditors.

Solvency Analysis

Assisted in evaluating the solvency and business model of several related companies, pursuant to a bankruptcy.

Residential Construction Bankruptcy

Assisted a residential construction company in bankruptcy re-organization proceedings.

Bankruptcy Oversight

Engaged by the court to oversee the financial activities of an individual with substantial assets and liabilities in bankruptcy proceedings.

Bankruptcy Workout – Retail Grocer

Assisted counsel in creating a bankruptcy workout plan for a retail grocer. The project included a detailed analysis of the business operations of the grocer, implementation of cost cutting measures and creation of detailed cash flow forecasts.

Bankruptcy Workout – Manufacturing secretaries

Assisted counsel in creating a bankruptcy workout plan for a manufacturing operation. The project included a detailed analysis of the business operations of the manufacturer, implementation of cost cutting measures and creation of cash flow forecasts.

Accounting for Dissolution of Real Estate Development Partnership

Oversaw an accounting for the dissolution of a real estate development partnership. The dissolution resulted from litigation between the general partner and the limited partners and covered 20 years of operations.

Supply Chain Process Improvement

Provided consultation and analysis for \$1.5 billion technology company regarding business process improvements throughout the company's supply chain.

Utah Water Conservatory District

Provided advice and consulting service related to municipal water litigation.

Valuation of Investment Opportunity

Consulted with a commercial airline component manufacturer regarding the value of investing capital and resources into a new business venture. The analysis included an evaluation of overall company strategy and a net present value profitability analysis.

Electronic Litigation Database

Engaged by a technology company to oversee the creation of a litigation document database that allowed the client and multiple law firms in the U.S. and several international locations to access and share litigation related documents and information, track productions and search for critical documents. The database was ultimately used in multiple litigation matters.

Creation of Electronic Litigation Database

Engaged by a technology company to oversee the creation of a litigation document database containing over 100,000 documents. The project included assistance in identifying applicable documents and managing the process of electronically scanning the documents and coding key information to create a searchable database.

Inventory Reduction Project

Facilitated an inventory reduction initiative for a computer maker. The project required the cooperation of multiple business groups within the company with different incentives and motivations related to the company's level of inventory. Through effective facilitation of the competing interests, inventories were reduced substantially.

Strategic Marketing Analysis

Assisted Applied Materials with a project designed to expand the role of business unit and corporate marketing beyond the historical role of tactical activities and sales support into driving business unit strategy and direction. The project included a benchmarking examination of the strategic marketing role, organization, and processes of Applied Materials in comparison to other organizations with strong strategic marketing organizations, including Honeywell, Cisco, GE, Proctor & Gamble, etc., via extensive interviews and analysis of each of the participating companies.

Rebate Process Correction

Advised a consumer products company on business process and regulatory compliance issues related to the effective and efficient administration of multiple consumer promotion campaigns.
