SUMMARY

Professional Electrical Engineer licensed in 10 states with over 30 years of experience designing electrical and communication systems for governmental, commercial, and industrial projects. Extensive career experience as Engineer of Record for hundreds of electrical design projects. Began Highline Electrical Services in 2018 to share my experience by offering Expert Witness services for legal cases.

CURRENT ENGINEERING EXPERIENCE

Goodwyn Mills & Cawood, Inc., Montgomery, AL – November 2006 – present
Executive Vice-President – Electrical Engineering

- Engineer of Record for the electrical and communication design of all projects. Primary projects include industrial plants & facilities, municipal plants & facilities, NASA & other governmental facilities, utility distribution systems, K-12 & college buildings.
- Primary areas of work include power, lighting, and communication design for facilities; arc flash studies; and utility coordination.
- Familiar with NFPA 70 (National Electric Code) and NFPA 70E (Electrical Safety in the Workplace).

EDUCATION

- Master of Business Administration: Auburn University at Montgomery – March 1997
- Bachelor of Science, Electrical Engineering: Auburn University – March 1994

PAST ENGINEERING EXPERIENCE

Averrett Consulting, Inc., Montgomery, AL – April 2000 – October 2006

President

- Developed, implemented, and self-funded a business-plan to provide Master Planning services to the military. Clients include the Atlantic Division of the US Air Force (LANTDIV), AAFES (the military retail services provider), and several local architects.
- Expanded the business to provide design and construction management services for the growing automotive industry in Alabama.

Sherlock Smith & Adams, Montgomery, AL - April 1994 – March 2000

Electrical Engineering Project Manager

- Designed electrical systems for governmental, commercial, and industrial projects; marketed engineering services and wrote engineering proposals for a global market. Primary projects include hospital renovations.
- Marketed engineering services to schools throughout the state of Alabama and worked closely with the Board of Education in areas that utilized our services.
