### **PROFESSIONAL EXPERIENCE:**

Physician, Diabetes Associates Medical Group, Orange, California **January 1995 - Current**

- Actively employed in Private Practice in Endocrinology and Diabetes, clinical practice and clinical research: I consult on patients admitted to the hospital with endocrine problems and I consult on patients in the office setting. I obtain a history from the patient and perform a detailed physical examination, evaluate laboratory results and imaging studies, explain to the patient the diagnosis and the various treatment options. I provide patient education as well. I am a principal Investigator for clinical research. Through clinical research I work with various pharmaceutical companies to bring new medications to the market. I supervise the staff at the medical practice. I am a patient advocate. I consult at the Lestonnac Free clinic once a month and travel internationally for medical missions. I am involved in various charities and philanthropic organizations. I mentor medical and nursing students in the office setting.

- Expert Medical Opinion **2000 -Current.**
