**JAMES A. JACOBS, P.G., C.H.G., C.P.G., QSP/QSD** Forensic Evaluations and Cost Estimates  
Principal Geologist Assessment and Remediation at Industrial Facilities  
Underground Storage Tank Assessment and Cleanup  
Sustainable Remediation and Case Closure Strategies

**SUMMARY**

Mr. Jacobs has over three decades of experience as a geologist and licensed contractor focused on answering geologic, environmental impairment and forensic questions. Some of the projects relate to collecting, describing, and analyzing soil, rock, groundwater, vapor and stormwater samples, summarizing the data and creating useful technical information and cost recovery statements for decision makers or settlements. Other projects relate to peer review and contractor evaluation projects. 1990, he has worked extensively on and written widely about the assessment and remediation of soil and groundwater impacted by petroleum hydrocarbons, chlorinated solvents, and heavy metals. He is the qualifying individual for the contractor license (#799370) in general engineering, drilling, building, hazardous waste removal, and asbestos removal. He has supervised dozens of underground storage tank removal projects. He is a Fulbright Senior Scholar winning 4 awards in environmental engineering and science teaching post-graduate workshops in risk-based subsurface environmental management and sustainable remediation methods, including field sampling methods, laboratory analysis, data evaluation and reporting. He developed and taught Sustainable Remediation Methods for Soil and Water (X-451) for the University of California, Berkeley Extension Program. He has developed, co-authored and edited books on topics such as MTBE (2000), Chromium(VI) (2005) and most recently, Acid Mine Drainage, Rock Drainage and Acid Sulfate Soils (2014; Wiley and Sons), Oil Spills and Gas Leaks (2014, McGraw-Hill) and Hydraulic Fracturing and Development of Unconventional Oil and Gas Resources (in press, McGraw-Hill). Jacobs has bachelors and masters degrees in geology.

**SPECIALTIES**

**Sampling and Evaluation of Subsurface Data**

- Development of sampling programs (groundwater, soil, vapor, surface water, and stormwater),
- Assessment, remedial design and implementation of cleanup for hydrocarbons, metals, and solvents,
- Development and implementation of free-product removal technologies at various sites,
- Development of bench testing, pilot testing and full scale remedial programs, and
- Negotiate with owners and regulatory agencies for settlement agreements and case closure.

**Litigation Support and Expert Witness**

- Perform litigation and technical support for various environmental and engineering cases from evaluating remediation history to well damage to erosion control;
- Estimate reasonable and necessary remedial costs for settlement conferences
- Serve as an objective peer reviewer; and
- Provide expert witness testimony on environmental cases.

As a technical writer and geologist, he has co-authored/edited five environmental science books. He has co-authored over 100 technical articles on water treatment and environmental issues and has given over 50 technical presentations.

TEL: 510-307-9943; FAX: 510-232-2823

As a public policy specialist and an elected public official, Mr. Jacobs has also been involved with storm-water and wastewater issues and treatment at two local sewer plants. Since 2002, he has served on the Board of Directors of the Tamalpais Community Services District (<http://www.tcsd.us/>), the local sewer, refuse and recycling agency serving 2,500 homes. He is an elected Commissioner of the Sewerage Agency of Southern Marin since 2002, and (2009-2011) was the president to the wastewater agency that operates the treatment facility in Mill Valley, California. From 2002 to 2009, he has been a TCSD representative to the Sausalito-Marín City Sewer Agency. He has promoted and supported sustainable environmental practices within the TCSD, a certified green business which now offers residents recycling of electronic waste, fluorescent bulbs, medicines, batteries, paper and cardboard. In 2009, 1 million less lbs of waste were processed by TCSD than in 2006.

He has designed and implemented laboratory feasibility testing programs and performed *in-situ* soil and groundwater treatment of chromium (VI), petroleum hydrocarbons, solvents as well as recalcitrant compounds such as perchlorate, MtBE and metals. He has served the environmental community as an officer or board member in a variety of professional societies, including the Groundwater Resources Association, the California Council of Geoscience Organizations and the California Section of the American Institute of Professional Geologists. He is on the Scientific Advisory Board of the Association for Environmental Health and Sciences.

**BIOTREATMENT AND REMEDIATION CONSULTING:** In 1990, he co-founded an environmental consulting company which included an inter-disciplinary team of scientists and engineers. The company currently has more than a dozen employees performing *in-situ* geochemical studies and environmental remediation, and for the past twenty years, Jacobs has been the Chief Hydrogeologist. His most recent inter-disciplinary research is associated with infusion of hydrogen gas and carbon substrates into waste liquids and water for anaerobic biotreatment of chlorinated solvents, metals, and high-strength organic waste products.

**BIOTREATMENT AND REDOX RESEARCH AND TEACHING:** Jacobs is a Fulbright Scholar, who has won 3 separate awards from the Council for International Exchange of Scholars (CIES) for teaching environmental engineering and science seminars, workshops, and graduate classes on optimizing geochemistry and *in-situ* remediation methods. Participants included graduate students, professionals, and regulators. He is teaching Sustainable Remediation Methods for Soils and Groundwater (X451) at the University of California at Berkeley (Extension Program), spring 2011.

## **AWARDS**

### **ACADEMIC AWARDS:**

1981: R.K. DeFord Field Scholarship Award; University of Texas at Austin  
2003: Fulbright Senior Scholar Award, Univ. of West Indies, Kingston, Jamaica; February–March; CIES  
2004: Fulbright Senior Scholar Award, Univ. of West Indies, Kingston, Jamaica; March–April; CIES  
2008: Fulbright Senior Scholar Award, Afeka Engineering College, Tel Aviv, Israel; March–April; CIES  
2007–2011: Selected and Served on Fulbright Peer Review Committee; CIES  
2012: Fulbright Senior Scholar Award, SRTM University, Nanded, India; January – February; CIES

### **PROFESSIONAL AND TECHNICAL AWARDS:**

1999–2004: Elected to the Board of Directors, Groundwater Resources Association of California  
1996–1998; 2009–2010: Elected President of San Francisco Branch, Groundwater Resources Association  
1998: Groundwater Resources Association; President's Tribute Certificate  
2000: Elected National Advisory Board, American Institute of Professional Geologists  
2001: American Institute of Professional Geologists, National Presidential Certificate of Merit  
2004: California Council of Geosciences (CCGO) "Gold Award"  
2010: American Institute of Professional Geologists, National Presidential Certificate of Merit  
2005–2011: Selected for Advisory Board, Association for Environmental Health and Sciences

[www.clearwatergroup.com](http://www.clearwatergroup.com) Since 1990  
229 Tewksbury Ave., Pt. Richmond, CA 94801  
TEL: 510-307-9943; FAX: 510-232-2823

2011: American Institute of Professional Geologists: Honorary Membership Award  
2013: American Institute of Professional Geologists: Elected National AIPG Vice President

**PUBLIC SERVICE AS ELECTED OFFICIAL**

2002–2014: Director; Tamalpais Community Services District; President or Vice President (2004-2012)  
2002–2014: Director; Sewerage Agency of Southern Marin; Vice President (2008), President (2009-2011)

**PROFESSIONAL ASSOCIATIONS:** Jacobs has served as president for several professional societies: the California Section of the American Institute of Professional Geologists, and the Groundwater Resources Association of California (GRAC), San Francisco Branch. He was on the board of directors for GRAC for several years. He is also a member of many other professional organizations. He served as president and co-founder of two non-profit organizations: the California Council of Geoscience Organizations, which educates legislators and the public about geologic and environmental issues, and CORE Environmental Foundation, which focuses on funding environmental remediation projects through the Underground Storage Tank Cleanup Fund. With his interest in water treatment optimization, recycling, and energy use, Jacobs has served for nine years as president or vice president on the Board of Directors of the Tamalpais Community Services District providing local sewer, refuse, and recycling services to 7,500 residents. Since 2002, he has been an elected commissioner of the local publicly owned treatment works, and served as president for two years. Since 2002 he has been a commissioner of the Sewerage Agency of Southern Marin wastewater treatment plant, and served as president for 3 years.

**PROFESSIONAL WORKSHOPS:**

Jacobs designed and taught the Sustainable Remediation Methods for Soils and Water for the University of California, Berkeley Extension program in Spring 2011 and Fall 2011. Jacobs has taught other environmental workshops at national meetings, including the following:

Two Phase Extraction Methods, Application for Groundwater and Soil Remediation. A four hour Workshop presentation given by Mehmet Pehlivan, James Jacobs and others:

- American Institute of Professional Geologists, 2009 National Meeting, Grand Junction, Colorado
- Association for Environmental Health and Sciences, 2008, National Meeting, San Diego, California
- Association for Environmental Health and Sciences, 2010, National Meeting, San Diego, California
- Battelle Chlorinated Solvent Conference, 2008, Monterey, California

RBCA Grows Up: Introduction to Environmental Hazard Evaluation and Advanced Approaches for Site Investigations. A four hour Workshop presentation given by Roger Brewer, James Jacobs and others:

- Association for Environmental Health and Sciences, 2009, National Meeting, San Diego, California

**REGISTRATIONS / LICENSES / CERTIFICATIONS**

Registered/Licensed Geologist: California #4815; Alaska #A227, Arizona #39066, Idaho #693, Oregon #G-1147, Pennsylvania: # 1152G, Texas Geology #11552, Wyoming: #PG-2328, Washington #1815  
Certified Hydrogeologist: California #0088, Washington #1815  
Registered Environmental Assessor I: California # 1511; REA II: #20171 (program discontinued).  
Certified Professional Geologist, American Institute of Professional Geologists, # 7760

[www.clearwatergroup.com](http://www.clearwatergroup.com) Since 1990  
229 Tewksbury Ave., Pt. Richmond, CA 94801  
TEL: 510-307-9943; FAX: 510-232-2823

Certified Petroleum Geologist, American Association of Petroleum Geologists, #6231  
Registered Asbestos Inspector and Management Planner: AHERA Accredited; OLA Registration # 0000450  
Responsible Managing Officer: License #624461: General Engineering Contractor,  
Certified for Asbestos Abatement, Hazardous Materials Removal, C-57 Well Drilling.  
California Commercial Driver License: C with Hazmat Endorsement  
California Qualified SWPPP Developer (QSD) and Preparer (QSP); Certificate #21430  
Responsible Managing Employee: California State License Board (CSLB): General Engineering (A),  
certified for Haz-Mat Removal, Drilling (C-57), Asbestos Abatement and Building (B)

### **EDUCATION**

M.A. Geology, University of Texas, Austin, TX, 1981  
B.A. Geology, English, Franklin and Marshall College, Lancaster, PA, 1978

### **Post-Graduate Classes**

Environmental Law, Rice University Extension, Houston, Texas; 1989  
Fundamentals of Groundwater Hydrology, University of California, Berkeley Extension, 1985  
Groundwater and Soil Remediation, University of California, Berkeley Extension, 1993  
Intro, Contaminant Transport in Groundwater, University of California, Berkeley Extension, 1994  
Ecological Risk Assessment for a Sustainable Environment, University of Massachusetts, 2010  
Assessment Design/Professional Experience Panel, University of California, Berkeley Extension, 2010

### **PEER REVIEW**

Mr. Jacobs serves in a peer review capacity for several organizations. He served from 2006 to 2011 on the Fulbright Peer Review Committee, screening potential Fulbright scholars in environmental sciences. From 2005 to 2010, he served on the National Screening Committee for the American Institute of Professional Geologists for candidates applying for the Certified Professional Geologist designation. Since 2005, he has been on the Advisory Board for the Association for Environmental Health and Sciences. The duties include the review of abstracts submitted for presentations for the annual San Diego, California Soils, Sediments, and Water conference and reviewing student presentations. For litigation support services, offered since 1990, professional peer review is occasionally required. In October 2011, Jacobs performed a peer review for the University of California of the 2007 PG&E Hinkley, California Background Study Report.

### **PROFESSIONAL HISTORY**

1990- present; Chief Hydrogeologist; Environmental Bio-Systems and The Auger Group, Inc., dba Clearwater Group. Areas of work: California, Arizona, Oregon, Washington, Montana, Pennsylvania

1989-1990 Project Geologist, Harding & Lawson Associates (now MACTEC), Novato, California  
Areas of work: California and Arizona

1986-1989 Senior Oil Geologist, Petrofina Delaware (now Total), Houston, Texas  
Areas of work: California offshore and onshore basins and prospects

1981-1985 Exploration Oil Geologist, SOHIO Petroleum (now BP), San Francisco, California and Anchorage, Alaska Areas of work: Beaufort Sea, Chukchi Sea, Prudhoe Bay area

1979-1981 Consulting Hydrogeologist, Institute of Applied Sciences, North Texas State University, Denton, Texas  
Areas of work: Northeast Texas

1975-1978 Geology Technician, United States Bureau of Mines Coal Research Station, Bruceton, Pennsylvania Areas of work: southwestern Pennsylvania

[www.clearwatergroup.com](http://www.clearwatergroup.com) Since 1990  
229 Tewksbury Ave., Pt. Richmond, CA 94801  
TEL: 510-307-9943; FAX: 510-232-2823

**SAFETY TRAINING**

40 Hour OSHA (29 CFR 1910.120), 1989  
8 Hour OSHA Confined Space Training, 1995.  
8 Hour OSHA Competent Person Training, 1994.  
8 Hour OSHA Supervisors Management Training, 1993  
Transportation Training: DOT 49 CFR Parts 171-177, 1994  
Corporate Health and Safety Officer: 1990 to 2000  
Current 8-hr. refresher classes for OSHA and Asbestos Inspector/Management Planner

**PROFESSIONAL AFFILIATIONS**

Groundwater Resources Association of California

Director: 1999 to 2005; Technical Committee Chair: 2000 to 2005; Organization Treasurer: 1999, 2002  
Board of Directors of Groundwater Resources Association 1999 - 2004  
GRA San Francisco Bay Chapter: President: 1996-1998, 2009-2010  
GRA SF Vice President: 1995  
GRA SF Past President/Advisor: 1998, 2012  
GRA SF Field Trip Coordinator: 1998  
GRA SF Technical Chairman: 1994

American Institute of Professional Geologists

Elected National AIPG Advisory Board: 2000  
Elected National AIPG Vice President; 2012  
President California Section: 1996-1998; 2007-2014; Vice Pres.: 1996; 1999-2006  
California Section Treasurer: 1994-1995;  
California Section Delegate to National AIPG Meetings: 1996-7, 1999, 2004, 2008-present  
National Screening Committee: 2005-2010  
Sponsor of University of California at Davis AIPG Student Chapter: 2010-present

California Council of Geoscience Organizations:

CCGO Board of Directors: 1998 to present  
CCGO President: 2001, 2002, 2009, 2010  
CCGO Vice President/President Elect: 2000  
CCGO Membership Chairman: 1998-2005  
CCGO Secretary 2007  
Charter member representing California Section of AIPG: 1996-1998  
Lobbying: plan and develop annual Sacramento Drive-In: 1996 to 2010

National Water Well Association

Active Member 1989 to present

American Association of Petroleum Geologists

Active Member 1979 to present

Association for Environment, Health and Sciences

Scientific Advisory Board: 2005 to present

CORE Environmental Foundation (non-profit)

Co-founder and President 2009-present

ECON Magazine

Editorial Advisory Board, 1994 to 1996

## **REPRESENTATIVE EXPERIENCE**

Oil and Gas Field Environmental Projects— Performed Phase I Environmental Assessments at oil and gas production facilities. The environmental work was associated with site restoration, property transfer back to the land owners, bank refinancing and environmental regulatory responses to site conditions. Site remediation occurred on several sites. Cost estimates were prepared for settlement purposes. Assessment and remediation of hydrocarbons at hundreds of sites was designed and implemented over the past twenty years.

Site Remediation and Closure – Project Manager of dozens of underground tank removal projects. After the initial assessment, dozens of soil and groundwater remediation projects in California were performed for properties impacted with petroleum hydrocarbons or chlorinated solvents. Many of these projects were closed using *in-situ* remediation methods. Some of these projects used risk based corrective action (RBCA) models or risk assessment data showing limited exposures. From this approach, dozens of sites were closed.

Bioremediation of Contaminated Soils-Project manager for bioremediation of approximately 800 cubic yards of hydrocarbon-contaminated soils. Original diesel contamination exceeded 8,000 parts per million. After two months the levels of diesel in the soil were below 350 parts per million. On-site treatment lowered the disposal costs by allowing for Class III landfill disposal rates instead of Class II rates.

Bioremediation of Diesel and Gasoline Contaminated Aquifer – Developed above ground treatment equipment and supervised the installation of treatment equipment for a aerobic bioremediation treatment system for a rental car agency at the San Francisco International Airport. The treatment was part of a regulatory driven requirement on the site. Treatment of the groundwater was performed so that the treated effluent was disposed directly into the sanitary sewer.

*In-Situ* Chemical Oxidation of Diesel Free-Product – Directed the contracting portion of the project to inject hydrogen peroxide and acetic acid at high concentrations to remove diesel free-product near a well in Oakland, California. After the treatment event, the free product was reduced from 5 cm to 0 cm.

Phase II Subsurface Investigations-Program director and project manager responsible for dozens of Phase II subsurface investigations of commercial, agricultural, industrial and residential properties. The projects involve preparing work plans, supervising the drilling of borings and installation of Geoprobe® borings and monitoring wells, well development and sampling and report preparation.

Soil Remediation-San Francisco, California-Directed removal of underground storage tanks beneath the sidewalk and undercutting a major street in the city. Subsequent remediation was required by the regulators and was designed and performed using a three-foot diameter bucket auger rig to drill out the contaminated areas adjacent to the street and over a BART tunnel. The bucket auger holes were filled immediately after being drilled with a light neat cement grout. Supervised all field activities. The client was a contractor

Underground Storage Tank Removal and Soil Remediation-Permitted and supervised two 2,000 gallon underground storage tanks containing diesel and gasoline. After the tanks were removed, 20,000 gallons of highly contaminated water containing free product was removed from the former tank area. Soil remediation was performed by over-excavation of approximately 500 cubic yards. Reports were submitted and site closure is pending. The project from start to completion was less than two weeks. The client was a major bank.

Water Procurement - As a publicly elected official and President of the local services district board, Mr. Jacobs oversaw the purchase of irrigation water for local park facilities. Water rates at various use tiers

[www.clearwatergroup.com](http://www.clearwatergroup.com) Since 1990  
229 Tewksbury Ave., Pt. Richmond, CA 94801  
TEL: 510-307-9943; FAX: 510-232-2823

were examined and Mr. Jacobs led the board discussion to select a favorable long-term rate schedule for irrigating the landscaping at area parks.

Water Treatment Planning – Working with the board, and the two sewer plants, Mr. Jacobs participated on the board evaluation and discussion in the negotiation of a long-term (10 year) contract with one of the treatment plants at favorable rates. Part of the agreement included a successful financing of the required improvements.

Pipeline Improvement Projects and Financing – As the President of the board, Mr. Jacobs worked with the general manager and board to prioritize the sewer repair projects on the 28-mile sewer transportation network in the district. The district and the nearby treatment plants include several pump stations and other aging facilities. Mr. Jacobs reviewed several financing options for the projects, and led the board to approve the rate hikes. Later, a \$3,000,000 loan at 4.5 % interest was obtained to pay for the project, allowing for a more gradual increase in the sewer rates for ratepayers.

Regulatory Guidelines for Water Treatment – As a Fulbright award winner, Mr. Jacobs taught at the University of the West Indies in Kingston, teaching a graduate class in Environmental Engineering. In addition, he taught workshops related to establishing water treatment goals in Jamaica. Participants included regulatory officials, environmental consultants, students, petroleum company employees and others. Mr. Jacobs also organized for others to participate in the teaching of the materials. Continued training is proposed for upcoming workshops in Jamaica.

*In-Situ* Chemical Geofixation of Chromium (VI) – Directed and performed the contracting portion of the project to inject calcium polysulfide for chromium (VI) at a former wood treating plant in northern California. The chromated copper arsenic (CCA) chemicals found on-site included the arsenic (V) oxide, chromium (VI) oxide and copper (II) oxide used in the wood treating process. The CCA wood was used in the construction of cooling towers. Calcium polysulfide was used as the reducing agent, which successfully lowered the chromium (VI) concentration at the site over a period of 18 months.

*In-Situ* Perchlorate Study – Developed with the client, a field pilot study program for a rocket fuel burn test site in Hollister, California. The project was designed to inject water into the shallow vadose zone at high pressure to solubilize the perchlorate and to pump it out. The lithology at the site was clay. Groundwater was shallow (10-15 feet below ground surface). The water was injected using a high-pressure pump system connected to specialized rods driven into the ground by direct push rigs. Results indicated that although the approach was reasonable, at this site, the clays were too tight to allow for significant desorption of the perchlorate from the clay matrix.

Wetlands Sampling Project-Developed sampling plan for a wetlands sampling project and designed tooling and applications for a limited access, continuous core drilling program in a tidal wetlands. The samples included 5 soil samples to a maximum of 18 feet below ground surface and into peats and the Bay Mud to evaluate the presence of metal in the contaminated soils.

Aquifer Mapping and Potentially Responsible Party Study-Task manager for Preferred Pathways study over a two square mile industrial area at a Federal Superfund Site in Santa Clara, California. Designed the aquifer mapping study using thousands of groundwater monitoring wells and soil boring reports to define underground channel systems. The information was used to facilitate installation of remedial measures. In conjunction with the Preferred Pathways Study, a Potentially Responsible Party (PRP) study was designed and performed in the area. After evaluating over 400 businesses, a ranking system was developed. The results from the project allowed the client to try to recover some of the costs of remediation.

229 Tewksbury Ave., Pt. Richmond, CA 94801  
TEL: 510-307-9943; FAX: 510-232-2823

Environmental Impact Report-Designed and wrote the geology and hydrogeology sections of an environmental impact report for a proposed hazardous waste incineration facility in the San Francisco Bay Area. The client was a municipality.

Geological Feasibility Study - King City, California-Performed a geological feasibility study and a natural hazard assessment for an 800-acre university site. Project included compilation of historic aerial photographs, geologic and historic maps, soil surveys and previous engineering and architectural studies. The client was a private university.

Subsurface Drilling Programs - Supervised subsurface exploration drilling programs including interpretation and evaluation of data for vertical and lateral extent of contamination for hydrocarbons, volatile organic compounds and metals contamination at various sites. Designed and supervised the use of proprietary drilling tools for limited access drilling activities under canopies, in buildings, and in salt marshes. The clients include numerous consultants in the San Francisco Bay Area.

(Co-authored 41 articles included in the 2005 John Wiley Water Encyclopedia of Water, ed. Jay Lehr, 5 volumes, John Wiley and Sons, New York, NY) Topics included construction erosion control, *in-situ* remediation, metals treatments, microbial growth and numerous other environmental science topics. Currently working on Acid Mine Drainage: Assessment, Prediction, Prevention and Remediation (John Wiley & Sons).
