“I found Dr. Cranberg to be very thorough, resourceful, and exceedingly well prepared. He was very precise at his deposition and stood up well against a very seasoned lawyer. He knew the medical records better than either the defense lawyer or I did. The case settled; so I cannot tell you how he did before a jury, but I had complete confidence that he would have presented well. He was very easy to work with and was very accessible. He bills fairly. I would not hesitate to use him again.”
