

PROFESSIONAL PROFILE

J. Scott Friesen, PE

Mr. Friesen is a licensed professional engineer in California, Florida, Mississippi, Hawaii, Washington and Arizona and in two Canadian provinces (Alberta and Manitoba), is LEED® accredited (CaGBC) and certified as an energy manager (CEM). He has more than 15 years of experience in design and construction of HVAC, plumbing, and energy management systems. Scott has also worked for a major HVAC equipment manufacturer and supplier. He has also performed commissioning, energy audits and was involved in marketing and business development.

Scott is a member of Association of Professional Engineers, Geologist, Geophysicists of Alberta (APEGGA), American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), Association of Energy Engineers (AEE), American Society of Plumbing Engineers (ASPE), National Fire Protection Association (NFPA), International Code Council (ICC), and Association of Water Technologies (AWT).

Scott joined Ivey Engineering in 2010. His responsibilities include design and forensic analysis of HVAC, plumbing, fire protection and energy management systems. He performs site inspections, testing, research, product analysis, cost estimating; and is responsible for writing reports and testifying in depositions, hearings and trials.

EXPERIENCE (partial listing)

- *Approximately 75 HVAC, fire protection and plumbing design projects
- *Approximately 40 design error and omission expert engagements
- *Ten LEED® design projects
- *Eight HVAC and plumbing commissioning projects
