

**Department of Pediatrics
University of Cincinnati College of Medicine
Curriculum Vita**

Name and Personal Data:

Erik B. Hysinger, MD MSCE

Office Address: 3333 Burnet Ave
Location S 9th Floor
Division of Pulmonary Medicine
Cincinnati Children's Hospital Medical Center
Cincinnati OH, 45229

Phone: 513-803-3674

Fax: 513-636-4615

Email: Erik.Hysinger@cchmc.org

Education:

08/2002-05/2006	B.S.	Vanderbilt University (<i>magna cum laude</i>)
08/2006-05/2010	M.D.	Vanderbilt University
08/2014-08/2016	M.S.	University of Pennsylvania
08/2017-05/2018		Cincinnati Children's Core Leadership Program

Academic Appointment:

07/2010-06/2011	Intern in Pediatrics, Vanderbilt Children's Hospital, Nashville
07/2011-06/2013	Resident in Pediatrics, Vanderbilt Children's Hospital, Nashville
07/2013-06/2016	Fellowship, Pediatric Pulmonology, Children's Hospital of Philadelphia, Philadelphia, Pennsylvania
08/2016-present	Assistant Professor, Pediatric Pulmonology, Cincinnati Children's Hospital Medical Center, Cincinnati, OH

Licensing and certification:

12/2013-present	American Board of Pediatrics
07/2014-present	Children Research
08/2016-present	Ohio State Medical Board
01/2017-present	Pregnant Women/Fetuses/Neonates
01/2017-present	Academic and Regional Health Centers Core Curriculum
01/2017-present	Human Subjects Research Core Curriculum
02/2017-present	Responsible Conduct of Research
02/2017-present	Good Clinical Practice

09/2017-present CITI Curriculum for Animal Care and Use
09/2017-present Lab Core Curriculum
09/2017-present Occupation Health and Safety Awareness Training
09/2017-present Reducing Pain and Distress in Laboratory Mice and Rates
09/2017-present Working with Non-Human Primates in Research Settings
12/2019-present American Board of Pediatric Pulmonary Medicine

Awards and Honors:

2010 Vanderbilt University Pediatric Epidemiology Research Award
2014 Sprague Research Fellow
2015 ATS Fellows Track Symposium
2016 Young Investigators Research Forum
2018 Ohio Top Pediatric Pulmonologist
2018 ATS Pediatric Scientific Abstract Award

Clinical Activities:

My clinical focus is in children with aerodigestive disorders, bronchopulmonary dysplasia, bronchology, and chronic respiratory failure. I evaluate children in both the inpatient and outpatient setting. I perform 6-8 weeks of inpatient clinical service. In the outpatient setting, I conduct approximately 100 clinics and perform more than 300 bronchoscopies every year as part of the largest and oldest aerodigestive group in the world. In addition to my clinical expertise in diagnostic flexible bronchoscopy, I am trained in advanced diagnostic and interventional bronchoscopy including cryotherapy, endobronchial ultrasound, transbronchial biopsy, transbronchial needle aspirates, and endobronchial valve placement. Through these expertise I have continued to push Cincinnati Children's Hospital Medical Center to be the world leader in pediatric bronchology by establishing the most comprehensive pediatric interventional pulmonology program in the country. As part of advancing this field, I have led seminars on endoscopic cryotherapy and interventional pulmonology in pediatrics at international conferences across the world.

Over the past five years, I have partnered with neonatology, radiology, and cardiology to develop the Cincinnati Bronchopulmonary Dysplasia (BPD) Center, serving as the pulmonary co-director. The primary goal of the center is to provide personalized, multi-disciplinary care for neonates with BPD from birth through adolescence and improve cardiopulmonary outcomes. As part of the program, we are developing standardized algorithms for screening for pulmonary hypertension and weaning supplemental oxygen in the ambulatory setting. Through this program we have reduce morality by 50%, the need for tracheostomy by 30%, and decreased hospital readmissions by more than 75%.

Quality Improvement:

2014 Croup Clinical Pathway, Children's Hospital of Philadelphia
2014-2016 Unit Partners, Children's Hospital of Philadelphia, Fellow Representative
2017 Flexible Bronchoscopy Template, Cincinnati Children's Hospital Medical Center

2018 Home Oxygen Therapy Weaning Protocol, Cincinnati Children's Hospital Medical Center

Research and Scholarly Activities:

My research currently focuses on the diagnosis, evaluation, and impact of dynamic airway collapse on respiratory outcomes in neonates with bronchopulmonary dysplasia and aerodigestive disorders.

Grants and Contracts

Ongoing Research Support:

National Heart, Lung, and Blood Institute R01 HL 164420

Title: Trajectories of Regional Cardiopulmonary Structure and Function in a Longitudinal Cohort of Extremely Preterm Infants

Dates of Study: 05/2023-04/2028

Principal Investigator: Erik Hysinger MD, Jason Woods PhD, and Nehal Parikh DO

Role: Contact Principal Investigator

Grant Support: \$ 3,889,122, 20% effort

Patient Centered Outcomes Research Institute

Title: Monitoring Oxygen Levels of Premature Babies at Home and in the Clinic – The RHO Trial

Dates of Study: 09/2020-07/2024

Principal Investigator: Larry Rhein

Role: Site Principal Investigator

Grant Support: \$1,262,793, 5% effort

Trustee Award

Title: Calculating the Work of Breathing in Neonates with Bronchopulmonary Dysplasia

Dates of Study: 07/2022-06/2024

Role: Co-Investigator

Grant Support: \$100k/year, 1%

Completed Research Support:

Vanderbilt University Pediatric Epidemiology Research Grant

Title: Outcomes in Adolescent Suicide

Dates of Study: 06/2010-08/2010

Role: Principal investigator

Grant Support: \$5,000

Vanderbilt Institution for Clinical and Translational Research #VR6914

Title: Metabolic Profiles in Pulmonary Arterial Hypertension

Dates of Study: 01/2013-06/2013

Role: Principal investigator

Grant Support: \$5,000

National Institute of Health Training Grant in Cardiology and Pulmonary Clinical Research #HL-007891

Title: Outcomes in Neonates with Bronchopulmonary Dysplasia and Tracheobronchomalacia

Dates of Study: 07/2014-07/2016

Role: Principal investigator

Grant Support: \$108,432

Research Innovation Pilot Grant

Title: Quantitative MRI Assessment of Dynamic Trachea Collapse: Validation, Energy Expenditure, and Outcomes

Dates of Study: 01/2018- 01/2019

Role: Principal investigator

Grant Support: \$75,000

ARC Grant

Title: CCHMC as a National Leader in BPD

Dates of Study: 01/2018-12/2020

Role: Co-Principal Investigator

Grant Support: \$1,997,947, 10% effort

Radiology Clinical Research Pilot Funding

Title: C-arm Cone Beam CT and Augment Fluoroscopy Guided Transbronchial Biopsy: Safety and Feasibility

Dates of Study: 09/2020-09/2021

Principal Investigator: John Racadio, Erik Hysinger, and Christopher Towe

Role: Co-Principal Investigator

Grant Support: \$8,720.50 direct cost

National Heart, Lung, and Blood Institute R01 HL 1446689

Title: MRI Phenotyping of Early BPD and Prediction of Outcomes

Dates of Study: 04/2018-03/2023

Principal Investigator: Jason Woods, PhD

Role: Co-investigator

Grant Support: \$3,900,945, 5% effort

Research Innovation Pilot Grant

Title: Tracheal Distensibility, Diameter, and Bronchodilator Response

Dates of Study: 05/2022- 05/2023

Role: Principal investigator

Grant Support: \$75,000

GAP Funding

Title: Trajectories of Regional Cardiopulmonary Structure and Function in a Longitudinal Cohort of Extremely Preterm Infants

Dates of Study: 09/2022-09/2023

Role: Co-Principal Investigator

Grand Support: \$75,000

Quality Review of Publications:

1. **Hysinger E** and Pantich H. Paediatric Tracheomalacia. *Paediatr Resp Rev*. 2016. 17(9): 9-15. doi: 10.1016/j.prrv.2015.03.002. Epub 2015 Mar 17. PMID: 25962857. Citations: 96. 2017=15, 2018=19, 2019=23, 2020=15, 2021=12
 - o This is a comprehensive view of the development, physiology, diagnosis and treatment of tracheomalacia in children. I designed and drafted the manuscript.
2. **Hysinger E**, Friedman N, Jensen E, Zhang H, and Piccione J. Bronchoscopy in Neonates

with Severe Bronchopulmonary Dysplasia in the NICU. *J. Perinat.* 2019. 39(2): 263-268. doi: 10.1038/s41372-018-0280-y. Epub 2018 Dec 5. PMID: 3051879. Citations: 20. 2017=NA, 2018=NA, 2019=4, 2020=8, 2021=8

- This is the first study to define the findings of bronchoscopy in neonates with severe bronchopulmonary dysplasia. We discovered that dynamic airway lesion like tracheobronchomalacia were present in more than half of neonates with severe bronchopulmonary dysplasia. I designed the study, collected, analyzed, interpreted the data, and drafted the manuscript.
3. **Hysinger E**, Friedman N, Shinohara R, Padula M, Zhang H, Panitch H, and Kawut S. Increased Morbidity in Neonates with Bronchopulmonary Dysplasia and Tracheobronchomalacia. *Ann Amer Thorac Soc.* 2017. 14(9): 1428-1435. doi: 10.1513/AnnalsATS.201702-178OC. Epub 2017 Jun 16. PMID: 28622012. Citations: 59. 2017=3, 2018=4, 2019=14, 2020=21, 2021=16
 - This is the first cohort study to evaluate the impact of tracheobronchomalacia on neonates with bronchopulmonary dysplasia. We found that tracheobronchomalacia is associated with longer more complicated hospitalizations and the need for increased respiratory and feeding support at hospital discharge I designed the study, collected, analyzed, interpreted the data, and drafted the manuscript.
 4. **Lagatta J, Hysinger E**, Zaniletti I, Wymore E, Vyas-Read S, Nelin L, Truog W, Padula M, Porta N, Yallapragada S, Savani R, Grover T, Engle W, DiGeronimo B, Murthy K. The Impact of Pulmonary Hypertension in Preterm Infants with Severe BPD Through One Year. *J. Pediatrics.* 2018. 203: 218-224. doi: 10.1016/j.jpeds.2018.07.035. Epub 2018 Aug 29. PMID: 30172426. Citations: 41. 2017=NA, 2018=0, 2019=7, 2020=18, 2021=16
 - In this large, multi-site cohort study we identified increased morbidity and mortality for patients with bronchopulmonary dysplasia and pulmonary hypertension. I designed the study, collected, analyzed, interpreted the data, and edited the manuscript.
 5. **Hysinger E**, Bates A, Higano N, Benscoter D, Fleck R, Hart C, Burg G, De Alaracon A, Kingma P, and Woods J. Ultrashort Echo-time MRI for the Assessment of Tracheomalacia in Neonates. *Chest.* 2020. 157 (3): 596-602. doi: 10.1016/j.chest.2019.11.034. Epub 2019 Dec 17. PMID: 31862439. Citations: 17. 2017=NA, 2018=NA, 2019=NA, 2020=7, 2021=10
 - This was validation study that demonstrates the ability of ultrashort echo-time MRI to identify the location and quantify the severity of tracheomalacia without sedation or ionizing radiation. I designed the study, collected, analyzed, interpreted the data, and drafted the manuscript.
 6. Guanatilaka CC, Higano NS, **Hysinger E**, Gandhi D, Fleck R, Hahn A, Fain S, Woods J, and Bates A. Increased Work of Breathing Due to Tracheomalacia in Neonates. *Ann Amer Thorac Soc.* 2020. 17(10): 1247-1256. doi: 10.1513/AnnalsATS.202002-162OC. PMID: 32579852 Citations: 10. 2017=NA, 2018=NA, 2019=NA, 2020=3, 2021=7
 - This study used our previously validated ultrashort echo-time MRI to quantify the work of breathing related to tracheomalacia in neonates. I designed the study, interpreted the data, and edited the manuscript.
 7. Guanatilaka C, **Hysinger E**, Schuh A, Gandhi D, Higano N, Xiao Q, Hahn A, Fain S,

Fleck R, Woods J, and Bates A. Neonates with Tracheomalacia Generate Auto-PEEP via Glottis Closure. *Chest*. Online Ahead of Print doi: 10.1016/j.chest.2021.06.021.

PMID: 34157310. Citations: 0. 2017=NA, 2018=NA, 2019=NA, 2020=NA, 2021=0

- This study identified a previously unrecognized relationship between vocal cord motion and tracheomalacia in neonates. I designed the study, interpreted the data, and edited the manuscript.
