

## AREAS OF CLINICAL EXPERTISE:

Abdominal aortic aneurysm	Esophageal perforation	Posterior circulation stroke
Abdominal compartment syndrome	Extremity trauma	Pressure injury/ulcer
Abdominal pain	Fracture care and stabilization	Pulmonary embolism (PE)
Abdominal trauma	GI bleed	Pyelonephritis
Acute coronary syndrome	HCAP	Pulmonary embolism
Aortic dissection	Head trauma	Retained foreign bodies
Appendicitis	Healthcare associated pneumonia	Retroperitoneal hemorrhage
Assault	Heart attack	Sepsis
Asthma	Hemorrhagic stroke	Septic shock
Back injury	Infection	Shock
Blunt trauma	Intracranial hemorrhage	Simple pneumothorax
Cardiac arrest/CPR	Ischemic bowel	Small Bowel obstruction
Cardiopulmonary resuscitation	Ischemic stroke	Spinal cord injury
Carotid artery dissection	Lacerations	Spinal cord trauma/fracture
Cauda equina	Lumbar puncture (LP)	Spinal epidural abscess
Central cord syndrome	Meningitis	Spine fracture
Central Line Complication	Mesenteric ischemia	Standard of Care
Cerebral venous thrombosis	Mismanagement	Spine injury
Cerebrovascular accident (CVA)	Missed diagnosis	STEMI
Chest pain	Missed fractures	Stroke
Chest trauma	MRSA	Subarachnoid hemorrhage
Chest tube complication	Myocardial infarction (MI)	Surgical complications
Chest tube placement	Neck injury	Syncope
Cholecystitis	Necrotizing fasciitis	Tendon injuries
Compartment syndrome	Negligence	Tension pneumothorax
COPD	Occupational health	Testicular torsion
Deep vein thrombosis	Occupational injury	Thoracic aortic aneurysm
Dept. of Transportation Exams	Open fracture	Thrombotic
Difficult airway	Opioid overdose	thrombocytopenia pupura (TTP)
Difficult intubation	Osteomyelitis	Tissue plasminogen activator
Diverticulitis	Overdose	TPA
Electrocardiogram interpretation	Pancreatitis	Trauma
EKG interpretation	Perforated ulcer	Traumatic injury
Emergency Medical Treatment and Labor Act (EMTALA) violations	PE	Tube thoracostomy
Endocarditis	Peripheral vascular disease/ischemia	Wound complication
Endotracheal intubation	Pneumonia	Urosepsis
Epidural abscess	Pneumothorax	Urgent care
	Post-operative complications
