Summary of Expertise

I am Chief Practitioner and CEO of an orthotic and prosthetic (O&P) practice that provides comprehensive care for all ages. I specialize in custom-designed orthoses and prostheses for any type of injury, condition, or disease process that can be corrected or maintained with the use of specialized devices. I have over 100 educational certification extensions with the American Academy of Orthotists and Prosthetists and some 1,200 hours of continuing education spanning 35 years within the field of O&P. In addition, I have managed a multi-million-dollar O&P facility for over 35 years. My practice stays on the cutting edge of prostheses and orthoses design and assisted in the development of the smart walker, brimless above knee socket (T-Evolution), and the Acti-Ankle. I have received multiple awards, and my company has been featured on all national news channels, CNN, the History Channel, Family Circle magazine, and a multitude of local and regional publications for the advanced applications of O&P devices that we provide within our clinics. I have been called upon as an expert witness for legal cases since 1995.
